

# ADVANCED PROJECT MANAGEMENT PROGRAMME

## 2024 INTAKE

### ABOUT THE PROGRAMME

Cost and time overruns are common in projects across industries but can, with the appropriate knowledge and skills, be eliminated. The Advanced Project Management Programme (APM) equips managers with the principles and know-how to complete projects on time, within budget and according to expectations and specifications. The six modules offer a practical, step-by-step approach to managing a project over its entire life cycle – from inception to close-out. The APM is designed for current and prospective middle managers, as well as investors and developers, in all industries.
